1. Novelty (Art. 33 (2) PCT)

Each of cited documents D1 to D4 discloses quaternized polysiloxanes as specified in detail in present independent main claim 1 (for relevant passages, see the corresponding International Search Report).

Consequently, each of said documents D1 to D42 anticipates the subject

matter of present claim 1.

The same considerations also relate to the additional features of the following claims 2 to 12 when taking into account the full disclosure of each of said documents D1 to D4.

Therefore the subject matter of present application is not new in view of the disclosure of each of said documents D1 to D4.

2. Inventive Step (Art. 33 (3) PCT)

Providing an amended main claim which meets the requirements of Art. 33 (2) PCT, the applicant should relate the distinguishing feature to a surprising (unexpected) technical effect or make credible or plausible that the distinguishing feature is not derivable from the prior art teaching (Art. 33 (3) PCT).

3. Miscellaneous

In order to improve the understanding and legibility of the application, in the European regional phase, if any, the applicant is invited to identify the documents D1 to D4 in the description additionally and briefly discuss the relevant background art disclosed therein.
